

Benburb Bramleys Ltd

Fresh

Background

Benburb Bramleys Ltd is an established, family-run business situated just outside the County Tyrone village of Benburb.

The company commenced trading in 1991, processing Bramley apples into high quality ready-to-use fresh or preserved products for the UK and Irish food industries.

Benburb Bramleys has gone from strength to strength and in order to accommodate growing demand the company invested over £1Million in refurbishing the processing facility installing state of the art peeling technology, colour scanning systems to reduce defect levels and a fully automated computerised production control system. In addition a mixing system has been installed to enable the manufacture of fillings and compotes.

Benburb Bramleys Ltd's most recent investment is in additional peeling capability, new metal detection and stainless steel tanks for fruit filling supply.

Our team will work with you to design products to suit your needs and samples will be despatched promptly, usually within 1- 2 days.

Our fillings and compotes can be made with Bramley apple, apple and other fruits e.g. apple and blackberry, or other fruit mixes such as cherry, rhubarb or fruits of the forest.

Product Range

Apple Dice – various particle sizes available

Apple Slices – various dimensions available

Milled Apple – ‘Coarse’ or ‘Fine’ textures available

Apple Pulps – from high quality green pulps to ‘white’ whole apple pulp.

Customers

Benburb Bramleys currently exports 95% of its high quality Bramley apple produce to the UK.
