

Bailies Coffee Roasters

Bailies Coffee Roasters

Ambient

Background

At Bailies, our desire is to craft world-class coffee experiences. Experiences that honour the skilled labour of our farming partners across the globe with dignity and fairness. We work hard to source the highest quality coffee beans from origin. We're a business built on direct trade - on going where the world's finest coffees are grown, and forging lasting links with the growers, our farming partners. We source around 90% of our coffees from country of origin and more than 70% are sourced directly. By sourcing the harvest ourselves, we can ensure both the quality of coffee for our customers plus a fair price and ethical treatment for the producers

Our focus on the coffee journey doesn't end there. We believe the best coffee deserves the best equipment. That's why we team up with industry leading manufacturers of coffee machines, grinders and brewing equipment.

For over 20 years we have built long lasting relationships with our customers. Many of our first customers remain with us today and that's something we're very proud of. We also offer barista and equipment training, education and support. Each coffee business is unique and we understand you will have bespoke requirements and needs.
