Pure Roast Coffee

Ambient

Background

Pure Roast Coffee: Elevating Coffee Excellence: Founded in 2006 by Martin Symington, Pure Roast Coffee is a third-generation family business in Lisburn, Northern Ireland, and the only coffee roaster in the region with a BRC AA food standard accreditation. We specialise in convection roasting and creating custom coffee blends for airlines, restaurant chains, and independent coffee stores.

Our mission is to deliver high-quality coffee through innovative roasting and sustainable practices. We excel in private label and white label coffee production, offering customized blends tailored to each brand's identity and taste preferences. Our BRC AA accreditation ensures top quality in every batch.

We produce coffee beans, filter coffee, ESE coffee pods, and coffee bags in various pack sizes and formats. Using advanced Loring convection roasters, we produce even roasts that enhance the natural flavours of the beans. With a capacity of 2000 tonnes, we can handle orders of any size.

Our commitment to sustainability is reflected in our Rainforest Alliance, Organic, and Fairtrade certifications. We provide full support throughout the private labelling process, from blend development to delivery.

Our unique selling points include advanced roasting technology, flexibility and scalability to serve customers of all sizes, and a reputation for premium quality and sustainable practices.
