

Squeeze Wheatgrass Ltd

Chilled

Background

County Down-based healthy drinks producer Squeeze Wheatgrass was established by Jacquelyn Stewart in 2010. The company specialises in producing a healthy and completely natural wheatgrass juice with provenance and full traceability.

The 'Wild Power' freshly squeezed wheatgrass juice range is produced for consumption in shot-sized 30ml & 60ml pouches which have a shelf-life of 12 weeks and is reckoned by researchers to be the equivalent in nutritional value of 1kg of leafy green vegetables.

The Wild Power Wheatgrass shots include Pure (30ml wheatgrass shots); Fuel (60ml wheatgrass with beetroot and blackcurrant); Awaken (60ml wheatgrass with apple and pear) and Refresh (60ml wheatgrass with orange and lemon).

The award winning company has been successfully selling Wheatgrass shots

through its e-commerce website for a number of years and has secured listings for its 'Wild Power' range with prestigious retailer, Fortnum and Mason in Piccadilly, London and online retailer Ocado.

Squeeze Wheatgrass uses the latest hydroponic technology to grow the wheatgrass for processing into a distinctive dark green coloured juice.
