

Suki Tea Makers

Ambient

Background

Turning 18 years old this year (2023), SUKI TEA now has a dream, state-of-the-art 7500 sq. ft Tea Factory as its HQ to help the team continue delivering excellence for its wide customer base. The new factory provides the perfect creative space for innovation in blending and recipe creation, and a dedicated tea-rista training room for all customers.

The new factory move will also assist SUKI in its goals for net zero carbon, leading the way for a cleaner future for its business. In line with SUKI TEA's mission to be an ethical and sustainable organisation, the new factory has allowed the business to reduce its Scope 2 emissions down to zero, superseding its environmental target to reduce the business' emissions by 50% by 2030.

The new facility is powered by 100% renewable energy sources including a 10kW Solar PV system. LED sensor lighting and PIR controls are installed throughout, along with large windows for maximised use of daylight and recycling of key waste streams.

SUKI TEA, which was formed from friendship between founders, Annie and Oscar in 2005 in Belfast, has grown to be a leading loose leaf tea brand supplying thousands of hotels, cafes and delis across the UK, Ireland and further afield. With the new factory opening, the business expects to increase its production capacity by over 600% over the next decade, creating employment in many areas of the business for the continued market expansion.

Product Range

Product available to both foodservice and retailers.

Loose leaf tea, loose leaf pyramid teabags and tea accessories.

Amongst the range of almost 50 blends in black, green, white, oolong, fruit and herbal, there is:
