

# Mette

## Background

Mette is a multidisciplinary creative studio, thinking, designing and making for projects in food, interiors and design.

As well as developing our own products, we work with a variety of professionals from architects, designers, specifiers and manufacturers, through to brand agencies and events companies, all wishing to develop forward-thinking products and environments which strike a chord in the hearts of their audience.

Our ability to bring forward-thinking projects to life, from both a conceptual and practical perspective, is what attracts clients and customers such as 100% Design, Linkedin and Jamie's Ministry of Food, and acclaim from industry influencers including Wallpaper\* and Icon Magazine.
