

Nuprint Technologies

Background

Founded In 1984, Nuprint began as a specialist supplier of labels to the clothing industry and continually met the high standards of M&S, Fruit of the Loom, Dunnes, Burberry, and Harrods among others. In 2000, Nuprint was purchased by ITL Plc and was later bought back by present owners Alan McClure and Gavin Killeen in 2004.

Nuprint are BRC approved, Grade AA and getting things right is a Nuprint goal. Companies that choose high standards also choose Nuprint. We have printed millions of labels over the years and with each new label we work in close collaboration with our clients for the best fit solution. Our experience, insight and latest technologies helps our clients develop smarter labels that not only work harder visually but make their business better.

In 2015 Nuprint made a £1.4m investment in new equipment, that allows us to offer a new extended portfolio of products. Hot foiling and embossing are now part of the quality labels we can produce for you. We have added prestigious clients supplying print film wrap and shrink sleeves for various products
