

Ready Egg Products

Fresh Frozen

Background

Located in Lisnaskea in County Fermanagh, Ready Egg Products specializes in the manufacture of high quality pasteurized egg products packaged either in bulk palletcons or bag in box (e.s.l.).

Ready Egg Products maintains a dedicated flock producing in excess of 2 million eggs per week and upgraded its manufacturing capacity to 200 tonnes per week.

The company operates from a state-of-the-art processing plant using hi-tech pasteurization with the facility to customize mixes and is introducing new tempering technology. The plant has a manufacturing capacity of 200 tonnes per week and currently produces peeled, hard-boiled and liquid eggs.

The company delivers daily to food processing and food service customers throughout Great Britain and Ireland.

In March 2009, Ready Egg Products launched its range of high quality pasteurised egg products for the food service and food manufacturing industries.
