

Taste Joy Co

Ambient

Background

Taste Joy Company is a husband and wife team that started at the end of their first date in June 2016 when Callum surprised Tara with a jar of peanut butter because she said it made any day perfect.

Tara had always been a lover of peanut butter and now Callum had found a unique way to winning her heart, so he started to work on recipes with the hope of reintroducing her to a better version of her favourite product.

Then on Christmas of 2016, he carefully wrapped up his peanut butter creations and presented them, and based on the magnitude of the response it was obvious that refills would be required.

Callum promised to make peanut butter for the rest of Tara's life. He also proposed after just 3 months of knowing each other, and saying "yes" was the easiest and quickest decision Tara ever made.

Friends and family began showing interest and placing peanut butter orders and over time word started to spread, and it began to grow into a business.

In a nutshell Taste Joy is made with love for love, always was and always will be. It was too good to keep a lid on.
